- Speech that sounds significantly different from peers
- Concerns expressed by teachers or caregivers

Components and Procedure of the Denver Articulation Screening Exam

Preparation for the Exam

Before administering the screening:

- Create a comfortable, distraction-free environment
- Gather necessary materials (e.g., picture cards, recording sheets)
- Understand the child's developmental level and language background

Steps in the Screening Process

The general procedure includes:

- Introduction: Greet the child and explain the activity in simple terms to establish rapport.
- Observation: Watch the child's speech during casual conversation or play.
- Structured Tasks:

- Present picture cards or prompts that elicit specific speech sounds (e.g., /s/, /r/, /l/, /k/, /t/)
- Request the child to name pictures or repeat words containing target sounds

- Sound Production Assessment:

- Record whether the child produces sounds correctly
- Note substitutions, omissions, distortions, or additions

- Additional Tasks:

- Assess sound placement in words (initial, medial, final positions)
- Observe consistency across different word positions

- Summary and Recommendations:

- Determine if speech sound errors are within normal developmental range
- Decide if further comprehensive assessment is needed

Scoring and Interpretation

Results are typically categorized as:

- Pass: Speech sounds are appropriate for age
